Subject: Request to sustain the Prevention and Public Health Fund

Dear Chairmen Ryan and Murray and Ranking Members Sessions and Van Hollen:

As leaders in cancer from the treatment, research, and business communities, we have come together under C-Change, a 501(c)(3) committed to reducing cancer deaths using evidence-based strategies across the spectrum from prevention to end of life care. **We ask that the federal government make substantial, annual investments in prevention efforts to reduce the risk of cancer that are no less than their current level.** Over 500,000 Americans will die of cancer in 2013.<sup>i</sup> This is despite the fact that we can prevent about half of these cancer cases through reducing tobacco use, improving the quality of the foods that we eat, and increasing our levels of physical activity. More cancer deaths are preventable by following the recommended United States Preventive Services Task Force cancer screening guidelines. Through federal funding for prevention, you have the power to support these changes by offering Americans more opportunities to make healthier choices, more easily.

Investing in cancer risk reduction will not only save lives, but will also reduce the amount of money that this country is spending on healthcare. Investments in prevention have a 5 to 1 return on investment.<sup>ii</sup> This means that fewer American families are burdened with the pain and suffering related to cancer, and our healthcare system has more resources for improved treatments for remaining patients.

The Prevention and Public Health Fund was designed to save lives through prevention and reductions in the rate of growth in private and public healthcare costs, yet it continues to be under threat. In 2012, the Middle Class Tax Relief and Job Creation Act reduced the Prevention and Public Health Fund by \$6.25 billion over 10 years to temporarily extend unemployment benefits and avert Medicare payment cuts. We reject being forced to make a

false choice between prevention, treatment, and research. We have to invest in each. To realize the return on investment, and to protect America from unnecessary sickness and death from cancer, **we ask that you support that use of Prevention and Public Health Fund be exactly as intended at current levels, and that it no longer be used to fulfill shortfalls in other aspects of healthcare, or otherwise.**

Respectfully,

David S. Alberts, MD
