The Prevent Cancer Foundation convenes the *Dialogue for Action on Colorectal Cancer Screening*, a yearly innovative and interactive national CME/CNE/CHES certified conference for colorectal cancer stakeholders. Since 1999, the *Dialogue for Action* has served as a forum to promote collaboration and idea-sharing across disciplines and culminates in action steps for change.

The *Dialogue for Action* has been successfully replicated in 17 states (including Arizona/New Mexico, California, Colorado, Kentucky, Maryland, Massachusetts, Michigan, Minnesota, Nebraska, New Jersey, New York, Ohio, South Carolina, Utah, Virginia, Washington State and West Virginia) and 10 American Indian/Alaska Native communities (Alaska Native Tribal Health Consortium, Black Hills Center for American Indian Health, Cherokee Nation, Great Plains Tribal Chairman's Health Board, Ho-Chunk Nation, Intertribal Council of Michigan, Kaw Nation, Mashantucket Pequot Tribal Nation, Texas Gulf Coast Native American Health Coalition and Alabama-Coushatta Tribe, and the Urban Indian Health Institute).

A five-year cooperative agreement with the Centers for Disease Control and Prevention funded much of this work in states, tribes and urban Indian health organizations.
